

REMEMBER ME

Remember me, please don't forget
My heart came home, but I'm here yet
My family holds me forever close
It's for their pain I care the most
So everyday please say a prayer
For all of us who still are here

It was a time of such unrest
And I was called to give my best
My country means a lot to me
I was scared, but believed in liberty

No one could know what we would see
The price we'd pay for this thing called free
This land, so different from our own
There's evil here and I feel so alone
We marched in rain never knowing where
At night we prayed our life be spared
At home you worried and questioned why
And bore the pain of no last goodbye
Remember me, Remember me. Remember me
